

International Awards

Award Best Software 2003

on the occasion of the international EUMETSAT Meteorological Satellite Conference 2003 for our software presentation

“Real-time image analysis and nowcasting with MSG data”

It was the first worldwide specialist conference shortly after the availability of the new Meteosat 2nd generation satellites. The specialist audience had a week to get to know the new systems, their range of functions and the stable performance better.

At every exhibitor stand that was able to demonstrate the processing of the new satellite data, at least parts of our software were running in the background, i.e. our high-quality real-time preparation and preprocessing of the raw satellite data.

**Subject: The 2003 EUMETSAT Meteorological Satellite Conference
Weimar, Germany: 29 September – 3 October 2003**

Dear Mr. Scheiber,

Congratulations on being awarded the prize for the best software demonstration. Your demonstration entitled "**Real-time image processing analysis, and nowcasting with MSG data**" was voted the best by other conference participants. The judgement was made based upon scientific content, presentation and overall interest and relevance.

Thank you for your work in contributing to the success of the Conference. We look forward to seeing you again next year in Prague.

Yours sincerely,

Madeleine Pooley
